EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claims 4,5,6 and 7 have been cancelled.

Allowable Subject Matter

Claims 1-3, 8 and 9 are being allowed.

The following is an examiner's statement of reasons for allowance:

In the closest prior art of record, Comagic et al teach (see Applied Radiation and Isotopes 56 (2002) 847-851) reaction of 1,2-dibromo ethane with the [^{18}F] fluoride/Kryptofix 2.2.2. /carbonate complex in acetonitrile. However, the reference fails to teach the treatment of a solid support-bound precursor of formula (I) to produce the [^{18}F] fluorohaloalkane, which is the key step in the instant process. The closest prior art of record provides no motivation to a person of ordinary skill in the art to modify the compounds taught by the reference to arrive at the applicants' process. Therefore the process of making the instant compounds as claimed herein is found to be unobvious in view of the closest prior art of record.

Conclusion

Claims 1-3,8 and 9 are being allowed. Claims 4,5,6 and 7 have been cancelled.
